

Cross Manufacturing Company (1938) Ltd.

Devizes,

Cross supply sealing products to the aerospace, automotive and power generation industries, worldwide.

Due to increasing demand for these products we have the following vacancy:-

Multi-Skilled CNC Lathe Operator

Automotive products

The Role

Reporting to the Turned ring cell leader you need to be self-managed and self motivated. Be able to program, set and operate Citizen Cincom K16 sliding head lathe producing high volume, precision sealing rings for the automotive industry.

Although the role is primarily operating and running CNC lathes, there are other operations carried out within the cell that the successful candidate will be expected to undertake.

Knowledge

- CNC Programming and operating a Fanuc control system
- Ability to read drawings and specifications
- Experienced in the use of sliding head lathe with bar feeder preferred, but not essential as training will be provided.

Requirements

The ideal candidate will have served a recognised apprenticeship to a minimum of City & Guilds or professional equivalent, which should be mechanically based.

This is a full time permanent position Monday – Friday working on a rotational shift in a clean and modern factory.

Package: 20-24K + Shift Premium and Overtime
Private Health
Good pension scheme
